NMWR DATA SUMMARY

SUMMARY TITLE: National Maintenance Work Requirement (NMWR) Data Summary
SPECIFIC INSTRUCTIONS: The contractor shall document a NMWR Data Summary containing a list of NMWR candidate parts provided by the Government. The summary will be in the Contractor's format, in end item hardware breakdown sequence. Each candidate part shall have a list of data elements completed by the contractor. The government may add or remove parts from the Summary based on their analysis. The final Summary will provide source data for the government to identify which components (parts) will have a NMWR prepared.
DATA IN LMI SPECIFICATION (Please provide the data product title): _____ _____
DATA NOT IN LMI SPECIFICATION (Please provide the data product title, its definition and its format): Title: NMWR Data Summary Required Data Elements: Component/Assembly Name Component Part Number & Commercial And Government Entity Code (CAGEC) Mean Time Between Failure (MTBF)* Source, Maintenance & Recoverability (SMR) Code Level of Maintenance (H-General Support and D-Depot) Government cost to buy new Government cost to buy rebuilt/remanufactured Contractor cost to rebuild/remanufacture broken down as follows: 1. Cost of any mandatory replacement parts and parts that will most likely be replaced. 2. Labor hours to; tear down, remove/replace parts, any machining, rebuild, inspection, and testing. 3.
